Why our caregivers are the “cream of the crop”

Our caregivers are highly trained, qualified and carefully selected individuals who are thoroughly screened, bonded and insured. Most importantly, our caregivers are dependable and extraordinarily caring.

Caring for a client often involves family, so we can also play a role in providing a respite for the primary family caregiver, i.e. a wife caring for her husband or a daughter or son caring for the parents.

Our Assessment Process

We conduct an in-depth assessment of your lifestyle, medical conditions and the kind of assistance that will help you remain independent at home. We will meet with you and your family and jointly determine the scope of optimum care.

During the meeting, we fully explain the services available, answer any additional questions you may have, and help with the important care decisions faced by you and your family.

Issues covered include:

- Daily routine
- Medical needs
- Emergency response
- Nutritional issues
- Home cleaning needs
- Matching with the right caregiver
- Cost of services
